Tips for Searching Environmental Science & Chemistry Articles

Bangor High School Library Page

Search the Maine Digital Library using a multi-database search or you can search individual databases by filtering for specific science categories by clicking “Subject.” Pay attention to whether they include full text or only bibliographic records. Examples include: Environment and Ecology, or Science

- Environment Complete
- Environmental Studies and Policy
- General Science Collection
- GreenFile
- GreenR
- Agriculture Collection
- Agriculture Collection
- Chemistry and Ecology Journal
- Aquatic Sciences and Fisheries Abstracts

Multi Database Search/ Maine Digital Library

From Library Resources Page:

- Choose Maine Digital Library. At the top of the screen, click on Multi Database Search. Then, Gale Power Search. You may be asked to verify your “Geolocation” if so click yes, “Use My Location.”
- Click Advanced Search at the top of your screen a second time.
- Enter search terms. Combine terms if desired by using limiters or expanders, “and,” “or,” “not.” or consult Subjects below each entry for search term ideas.
- To specify certain dates, choose “after” and use the drop down menus to restrict date ranges.
- Note “Content Types” on right side of results list.
- Search a specific Environmental Journal Title if desired by selecting “Publications” at top. Note available Archives.
- If you find an article online that requires a fee, use the Publication search feature of Power Search to see if the journal is available in the archive. Don’t pay money, see us for Interlibrary Loan possibilities!!

Save to Google Drive Feature adds a full text article to your drive, and creates a Power Search folder for all of your articles – to stay organized!
Other Science Related Resources to Search

ScienceNews

A AAS – Science Journals

- From Bangor High School Library page, scroll down to the AAAS Logo, or access from the DATABASES page.
- Login not needed to access from school. Check Password brochure for remote access passwords.
- Contains current and archived journal articles.
- Download citation information.

Search for articles using Google Scholar

Google Scholar

Google Scholar is also linked to Maine Digital Library. Choose “A-Z Index” and scroll down to find “Google Scholar.”

General Research Strategies:

- If your search doesn’t produce results, revise by checking spelling, widen the search or broaden dates.
- With each search, note what terms produce “Hits.” Scan article abstracts for additional search terminology.
- Look for all necessary library passwords located in the Library Password Brochure available at the front desk.
- If searching produces an article that is not available full text through BHS Library links and other search strategies, locate the complete citation, print it out, write your name on it, and see Ms. Gould or Ms. Watson for further assistance. We will search our ILL accounts and other sources in an attempt to Inter Library loan the article for you. Do not pay for an article without checking with us first!

Citations

Owl Purdue Citation Site | Easy Bib http://www.easybib.com/ | Bib Me http://www.bibme.org/

APA/MLA citations for books, images, and other resource formats are located at the Owl Purdue Writing Lab. Search for citation tools in each database you are using. Create citations for sources that don’t provide you with one.

Primary Source: original materials on which other research is based. Immediate, first-hand accounts of a topic, from people who had a direct connection.

Secondary Source: interpretations and evaluations of primary sources.

Tertiary Source: summarizes or synthesizes the research in secondary sources. (Watson 2019)
